1. Measure your Switch Stand style(s). Most switch stand masts are either round or square. indicate in the appropriate box the dimensions of your mast, hole locations and height of mast above the gear case.

If you have a mast shape other than round or square, sketch the shape in the empty box and provide all dimensions.

Use more sheets as necessary to identify additional mast styles

2. Determine the direction(s) of your switch(es).

Left-Hand
Switch

Right-Hand
Switch

3. Indicate the quantity desired of each direction in the box above the mast drawing of your style of mast.
